The New Intel Core i7 Processor

Nehalem, the code name for the new Intel i7 processor line, is the latest in Intel's Core processors that had replaced the Pentium processor line 2 years ago. Intel states that the new Core i7 processors are the "fastest processors on the planet" and our tests show that indeed the new processors certainly outperform the latest generation of the Intel Core 2 Duo and Quad chips. Nehalem is particularly special because it marks a significant change in system architecture from the previous Core Duo design. The Core i7 chips each have four cores capable of up to eight threads. That's like having 8 processors in your system but still only having 1 physical chip.

The new Intel i7 or Nehalem processors have proceeded Intels 8086, 80286, 80386, 80486, Pentium, Pentium Pro, Pentium 4, and the Core 2 chips making it Intels 8th generation processor architecture.

What does all this mean for us users? Speed! We will be able to multitask applications faster and unleash incredible digital media right on your laptop or desktop PC. You'll experience maximum performance for everything that you do, thanks to the combination of Intel's Turbo Boost technology and Hyper-Threading technology, which maximizes performance to match your workload. Velocita Technology, Inc. of Joliet has the new Intel i7 processor available today. Contact your Velocita sales associate, to receive a quote on a new laptop, desktop or server equipped with the new i7.

3. What two elements make up the sun?
4. In 1981 which company introduced the first laptop?
5. Who has the best prices in Joliet, IL for Ink and Toner?

Drug Court Version 1.0

Will County Drug Court, a division of the Will County States Attorney James Glasgow's Office, is an intensive program designed to integrate drug abusers who have committed non-violent offenses back into the community by helping them break their addictions. As you might expect the amount of paperwork that is required by a program such as this is challenging. Julie McCabe-Sterr, the Will County Drug Court Coordinator, and her team had recently contracted with Velocita Technology, Inc. of Joliet to create a custom software application that will provide the Drug Court team an "all in one" tool to manage this process. After a number of planning and production meetings, Frank Brandolino of Velocita Technology, Inc. was able to create a custom application that would provide the Drug Court team the ability to manage the Drug Court processes and proceeders from one easy to use application. The application, DrugCourt ver1.0, is now currently being used by the Will County Drug Court team and is available to them securely from any Will County Office, the Will County Jail, or from the Will County Court House by way of the Will County wide area network. The process of creating this custom application was able to be accomplished within a timely 75 days from the initial meeting Frank had with the Drug Court team. By the Drug Court team choosing to have a custom software application developed by Velocita Technology, Inc. they were able to create the exact input screens they desired, the exact reporting layouts they required, and exactly how the total workflow process would take place. The Will County Drug Court team has been successfully using the new system for just over 60 days, and is now wondering how they ever managed the Drug Court process without it. Velocita Technology, Inc. provides custom software solutions for a number of area businesses. If you would like to receive a free quotation on a custom software application to manage your business, please contact your Velocita Technology sales associate at (815)744-9595 or by emailing help@vtjoliet.com.

Last Months Trivia Questions & Answers

Customer Spotlight

This months customer, Lamb's Fold Center for Women & Children, has been servicing the needs of displaced women & children within our community since 1984. In 1991, Christian Family Ministries was asked to take over the operations of the Lamb's Fold, where Rhonda Sykes and her team of employees and volunteers help homeless women and children, as well as victims of domestic violence, transition to successful independence through educational enhancement, supportive services, and personalized recovery services. Velocita Technology, Inc. of Joliet is proud to work with Rhonda and her team by providing computing hardware, software, maintenance, custom email services, custom internet filtering, custom safe internet access for children, as well as network wiring. To see how you can help the Lamb's Fold Center please visit their website at lambsfold.org or phone them at 815-723-5262.
